

RSX Press Features

- RSX096P provides forces up to 40,000 lbf (178 kN) in extend direction
- Ideal for hydraulic replacement in applications such as pressing, riveting, clinching, joining & other applications requiring high force in extend direction
- Planetary roller screw driven for long consistent life
- Type III hard coat anodized aluminum housing to withstand demanding environments
- Anti-rotation thrust rod, standard option
- IP67 option to protect against dust and water ingress (static)
- Compatible with servo motors and gearboxes up to 215mm frame sizes
- Food grade, white epoxy coating and stainless steel thrust rod option
