

THE ONLY DISC CONE CLUTCH IN THE INDUSTRY

Tolomatic engineers developed the Disc/Cone clutch in the early 1960's, and it's still the only disc/cone clutch available in the industry today. In this unique design the cone engages a cup on the pilot plate for immediate, positive engagement with no slippage. Tolomatic Disc/Cone Clutches offer high torque and compact profiles in lower cyclic applications.

DISC-PLATE, PILOT-MOUNT DESIGN

HIGH TORQUE

NO SLIPPAGE

SPACE-SAVING DESIGN

FAST RESPONSE BASED ON LOW AIR CONSUMPTION
