

RESTORE

Factory-authorized
re-manufacturing services
for ServoWeld™ actuators
from Tolomatic

Program Overview

Maintaining uptime is a top priority for optimized manufacturing environments. And it becomes more challenging when maintenance staff is reduced and spare parts inventories are under pressure. Partnering with a service provider who is responsive and reliable provides assurance you will have the equipment you need when you need it. The RESTORE program is intended to enable customers with large actuator fleets to update them to the most current factory specifications.

Program Features & Benefits

SIMPLE

Streamlined process to avoid unnecessary paper work and delays.

SUSTAINABLE

Reuses 60% of actuator components reducing waste as well as required resources.

ECONOMICAL

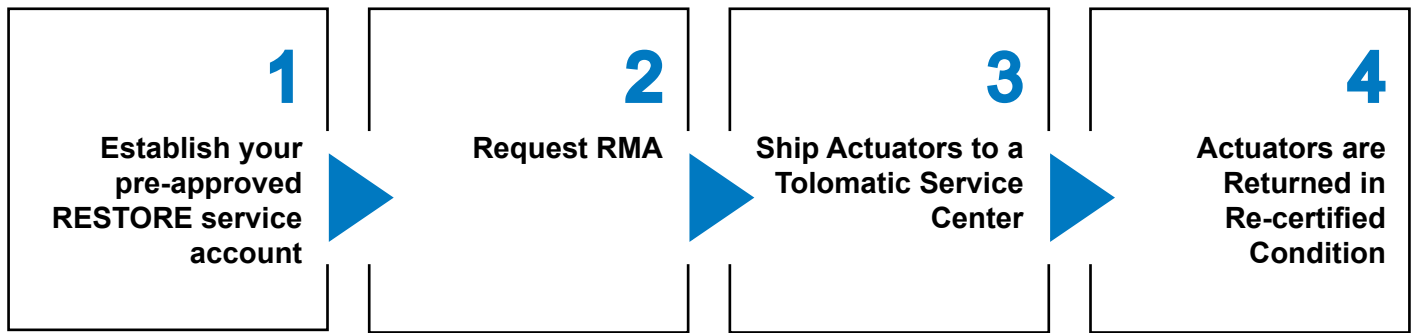

Substantial savings (up to 40%) compared to full replacement.

RELIABLE

100% tested and certified with a 12 month warranty.

How it Works

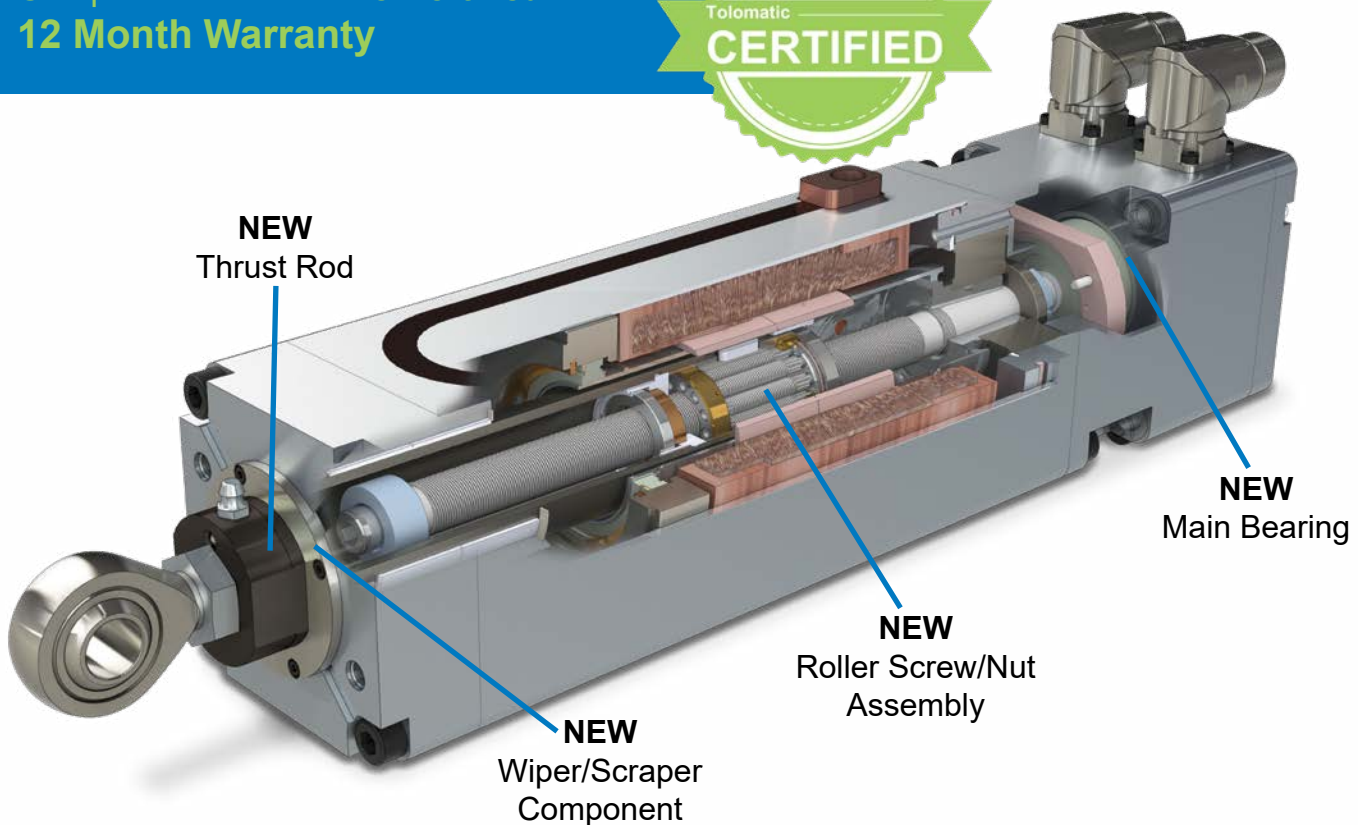

What's Included?

- New, Tolomatic certified, original performance components
- Actuator re-assembly and functional test

Benefits:

- Restoration to up-to-date factory specifications
- Verified mechanical and electrical functions
- Complete Actuator is **Re-Certified** with **12 Month Warranty**

Frequently Asked Questions

What happens if my actuator cannot be repaired?

- ▶ Sometimes actuators have sustained damage to a degree that repair is no longer economically feasible.
 - For example, actuators that exhibit significant water ingress will not, typically, be repaired because of corrosion of inner components. In these instances, it may not be economical to replace all the affected parts.

What if the cost of repair is more than buying new?

- ▶ If an actuator has additional components that need replacement above-and-beyond covered re-manufacturing and the total cost approaches that of a new unit: Tolomatic will contact the customer to determine the right path forward.

Are there items that are not included in the standard program?

- ▶ Following are examples of items that are not considered part of the standard RESTORE program:
 - Feedback device (Resolver or Encoder)
 - Brakes
 - Force sensors or amplifiers
 - Actuator head or back plate
 - Water cooling plates

Your **RESTORE** Service Team

- Expert life cycle service for your fleet of ServoWeldTM actuators.
- Experienced factory technicians, certified and trained in actuator restoration.
- Our priority – Maximizing the productivity of your welding equipment.
